Torchsec Technologies
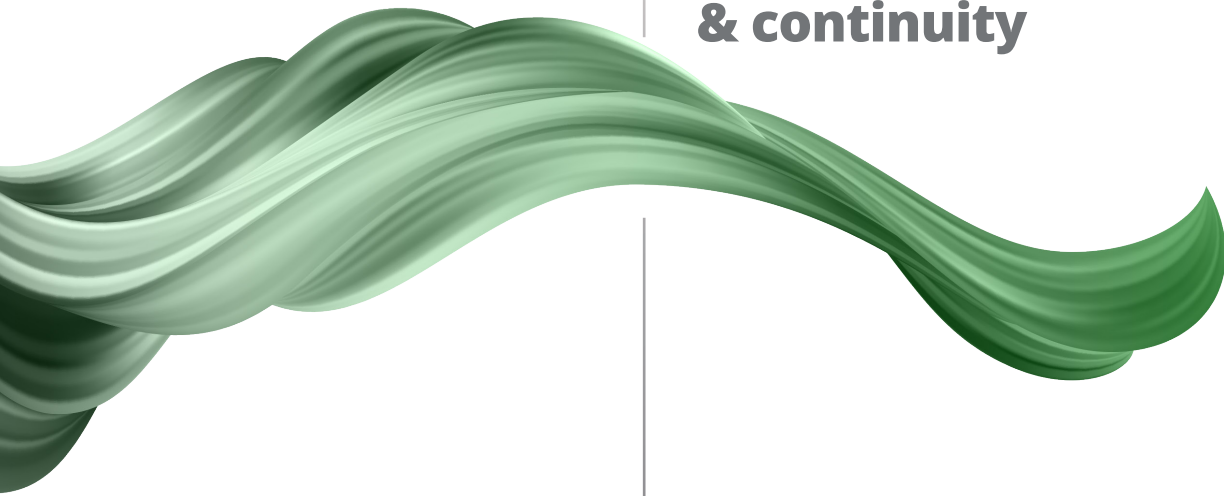

Discover comprehensive enterprise-class backup & continuity

Enterprise-Class Business Continuity and Disaster Recovery

Your data can reside almost anywhere. With new threats emerging every day, you can't escape worrying about losing the lifeblood of your business. You need to know you can recover from a disaster and defend against evolving threats like ransomware.

You need all-in-one enterprise backup and business continuity.

Wouldn't it be great if you had a simple, cost-effective solution that doesn't add to the complexity of running your business?

With our expertise and an industry leading backup solution, you get enterprise-class backup, ransomware detection, and cloud-based business continuity disaster recovery (BCDR) services housed in a powerful, all-in-one appliance-based platform. Which means you can take a break from data loss worries.

Disaster-Proof Your Business

Reduced downtime with instant recovery and automated disaster recovery testing means downtime won't take down your business.

When disaster strikes, we have your back, 24/7/365, delivering:

Quick Recovery From an Outage

Leverage the power of an onsite appliance. Fast local restore and on-prem failover reduces unplanned downtime and makes recovering from an outage near seamless. With a disaster recovery as a service experience you can be back up and running without missing a beat.

Simplified Backup

One appliance, one cloud makes it easy for us to spot and mitigate potential threats to better protect your business.

Intelligent Alerts

Cut the noise. The less time we spend remediating issues, the quicker the resolution. That means a reduced risk of downtime for you. With the power of BackupIQ™, our backup solution of choice leverages artificial intelligence to surface the most important issues, giving you confidence that the most critical issues are always being resolved as efficiently as possible.

Experience the Benefits

Increased Uptime

Reduced downtime with instant recovery, ransomware detection, and automated DR testing.

More Confidence

SLA policy automation results in greater recoverability and compliance, making it easier to define, analyze, and report.

Reduced Costs

Less downtime and reduced risk with the simplest and most reliable BCDR solution means more uptime and increases profitability potential.
