

MANAGED IT SERVICES: A MUST-HAVE

A trusted managed IT service provider doesn't just provide you with a software solution. They also deliver necessary support, consultation and maintenance—like us!

Whether you're looking for someone to be your entire IT team or just augment an existing gap – like cybersecurity or compliance – we rise to the challenge.

THE COST OF IT GAPS

COST OF DOWNTIME For SMBs, per-hour downtime costs vary from \$10,000 to \$50,000. ¹	COST OF INTERNAL THREATS The average cost of an internal threat-related incident for SMBs is \$7.68 million. ²	COST OF UNPATCHED SYSTEMS More than 60% of companies running on unpatched systems suffered data breaches. ³	COST OF COMPANY INFORMATION REACHING THE DARK WEB Over 60% of the information available on the dark web could negatively affect most businesses. ⁴
COST OF A BACKUP ERROR More than 50% of recoveries fail due to backup error. ⁵	COST OF NON-COMPLIANCE Other than the hefty fines from regulatory bodies like HIPAA, GDPR, etc., non-compliance leads to rejection of liability insurance claims. For example, PhilHealth reported it denied claims worth over \$115 million due to non-compliance issues. ⁶	COST OF INTERNAL SPEAR PHISHING Spear phishing is on the rise. In July 2020, 130 Twitter accounts, including Apple's, got compromised through spear phishing targeting Twitter employees. ⁷	

BENEFITS OF HAVING A MANAGED IT SERVICE PROVIDER
